

data_into_bronze.sql

Location: scripts/bronze/data_into_bronze.sql | Target Layer: Bronze Layer (Raw Ingestion / Landing Zone)

```
-- =====
-- Data Loading Script: Load Data into Bronze Tables
-- Database: cadetos_bronze
-- Project : CadetOS Data Warehouse
-- =====
-- Purpose:
--     Loads CSV files directly into the Bronze layer tables.
--     Lines are terminated by '\r\n' (CRLF) since the source CSVs have Windows
--     style line endings. This prevents hidden '\r' characters in the database.
-- =====
